**MANIFESTO**

I, **B. Nikhil (170050099)** of the Computer Science and Engineering Department, contesting for the post of **Computer and Web secretary**, if elected propose to do the following:

**WEBSITE**

**IMPROVEMENTS**

- Fix mobile compatibility issues with site. i.e,
  1. Portal and Activities buttons in the Hamburger menu.
  2. Mess menu’s slider.
- Presently the website does not have any photos under the gallery section in each of Cult, Sports and Tech genres – I’ll make sure to collect photos from the inmates and upload the best ones onto the website.
- Both Technical and Cultural GC’s standings were not found on the website, I’ll try to put all GC’s standings in the home page.
- Our Hostel website has relatively poor animations when compared to other hostels – I shall make sure that the quality of our animation is improved.
- I shall make sure to update the news section more frequently and cover every event in the hostel.

**INITIATIVES**

- Create an UI for the Key and Equipment issue (for both Cult and Tech) – so that the inmates can see the available equipment in real time.
- Create an UI, where each user can create his own profile – so that the inmates can have their personalised information on the site. Creating the profile has the following benefits:
  1. Council gets to know the interests of each inmate, which would be helpful for the GC’s.
  2. The users can get specific announcements related to the them.
  3. The users can be sent personalised notifications – like postal notifications.
- Introduce the system of awarding points to each wing based on participation in GC’s.

**APP**

**IMPROVEMENTS**

- Improve UI – The back button is not available in each section of the Hamburger menu. I will fix that.
- Update the calendar and try to make different calendars for each genre.
- Make adjustments in the design for different screen sizes.
- Introduce the Gallery section in the website.

**INITIATIVES**
• Try to apply and implement all the initiatives specified in the website section for app, by
• Make CMS portal available for the app also.

LAN AND COMPUTER

• Make sure that the LAN complaints are properly registered and resolved during vendor visits.
• Encourage people to use the website/app for registering their complaints.
• Make sure the computer’s software is up to date.

INITIATIVES

• Installation of printer for the computer and develop a software which deducts the corresponding money for the papers from mess balance.

OTHERS

• Installation of Routers in the study room as well as in the 4th wing.
• Ensuring the smooth organisation of ‘Gaming night’ in coordination with other council members.

AS A COUNCIL MEMBER

• Actively participate and publicise hostel related activities.
• Help the council for the smooth conduction of GC’s, Festivals and Events.

CREDENTIALS

• Web-scraping project – Programming Paradigms Laboratory(Course project)
